

ABSRA GIRMA

Software Developer · ERP & Odoo Specialist

absra12c@gmail.com | +251 985 787 139 | Addis Ababa, Ethiopia

[linkedin.com/in/absragirma](https://www.linkedin.com/in/absragirma) | Portfolio: absra.netlify.app

PROFESSIONAL SUMMARY

Software Developer specializing in ERP customization and Odoo development, with strong Python, SQL, and full-stack skills. Experienced in delivering compliance-critical integrations — including government e-invoicing (EIMS) automation within Odoo — and translating complex regulatory requirements into reliable, audit-ready systems across the full customization stack.

EXPERIENCE

Mid-Level ERP Developer — Pitron Tech Solutions

02/2026 – Present

Odoo 18 Community · Multi-Client ERP Delivery · Addis Ababa, Ethiopia

- **Multi-client Odoo 18 delivery:** Design and ship custom Odoo 18 Community modules across multiple client deployments — models, views, security, OWL front-end, QWeb reports, and CI/CD — including leading a multi-branch inventory management system replacing legacy software for a food & retail client.
- **Executive dashboards & data sync:** Built an OWL-based executive dashboard (`pitron_erp_dashboard`) with a scheduled cron-sync architecture that ingests external Performance Tracking and Cash Collection APIs into normalized snapshot models, delivering fast daily-aggregated reporting without live API calls in the UI.
- **Payment & device integrations:** Developed a Chapa payout webhook receiver with audit logging, idempotency via transaction reference, and automated draft vendor-bill creation, plus a ZKTeco biometric attendance integration.
- **Compliance & production support:** Implemented Ethiopian pension-law HR/payroll enhancements and an ERCA e-invoicing branch-registration module, and kept production instances healthy through production-safe SQL diagnostics — resolving module version conflicts and missing database constraints.

ERP Developer — Ashewa Technologies

07/2025 – 02/2026

Construction ERP Implementation (Odoo) · HR Consulting · Addis Ababa, Ethiopia

- **Construction-industry Odoo ERP:** Implemented and customized Odoo modules for construction-industry clients — spanning project management, procurement, inventory, and cost tracking — tailoring workflows to construction project lifecycles, site operations, and multi-project reporting.
- **HR consulting & payroll:** Provided HR consultancy and configured Odoo HR and Payroll modules to client policies — covering the employee lifecycle, leave, attendance, and payroll runs — advising on process design, statutory compliance, and system adoption.
- **Compliance & financial reporting:** Integrated the EIMS API for government e-invoicing and tax clearance (IRN and QR-code capture), linking validation data to Odoo's accounting records for audit-ready, traceable financial reporting.

Junior Techno-Functional Consultant — Top Technologies

12/2024 – 06/2025

Pharmaceutical ERP Implementation · Addis Ababa, Ethiopia

- **Process alignment:** Configured core ERP modules (Inventory, Production, QC) to meet Good Manufacturing Practice (GMP) standards and client SOPs, with a focus on accurate batch/lot traceability.
- **Configuration, master data & UAT:** Configured key components within the Grace ERP environment, prepared and validated complex master data (BOMs, Item Master), and executed structured UAT scripts to validate critical workflows, including materials receipt and final product release.

Junior Software Developer — Ministry of Innovation and Technology (Ethiopia)

11/2023 – 11/2024

Secure Document Management System · Addis Ababa, Ethiopia

- **Full-stack development:** Contributed to the design and deployment of a secure Document Management System (DMS) on a multi-tier architecture, using React.js for a responsive UI and Node.js for scalable backend services handling business logic, secure data transmission, and database operations.
- **Security, versioning & QA:** Implemented advanced user authentication and document versioning for comprehensive audit trails, enforced system security protocols, and improved code quality through unit/integration/UAT testing and detailed peer reviews.

EDUCATION

BSc in Computer Science and Engineering

07/2018 – 07/2023

Adama Science and Technology University

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML / CSS, XML, CSV

ERP / Odoo: Module development & extension, workflow automation, API integration; CRM, Sales, Purchase, Manufacturing, Inventory, Accounting

Web & Data: React.js, Node.js, PostgreSQL, pgAdmin, UI/UX concepts & design

Tools & Practices: Git & GitHub, Linux, deployments, Agile, OOP, RESTful API integration, cloud environments

Spoken: English, Amharic

Certifications: Linux Basics · Python · Odoo Technical Training · JavaScript
