SUMMARY

A motivated Software Developer with established proficiency in Python and SQL, driven by a keen interest in Enterprise Resource Planning (ERP) customization. Demonstrated ability to quickly assimilate and contribute to complex, real-world systems, specifically through providing technical assistance on a high-stakes API integration within the Odoo framework.

EXPERIENCE

ERP Developer, Ashewa Technologies EIMS API & Odoo Compliance Integration	07/2025 – 02/2026 Addis Ababa, Ethiopia
• End-to-End Document Automation: Engineered and implemented the EIMS API integration within Odoo to ensure mandatory government clearance for all financial documents. This covered Invoice (INV), Credit Note (CRE), and Debit Note (DEB) types, ensuring immediate receipt and storage of the Invoice Registration Number (IRN) and QR Code in Odoo upon validation. • Receipt Generation : Developed functionality to generate tax-compliant Sales Receipts directly linked to EIMS, automating cash transaction reporting. Crucially, established the process for managing and generating Withholding Tax Receipts within Odoo's Accounting module, ensuring accurate tax deduction remittance and client compliance. • Audit-Ready Financial Reporting: Directly linked EIMS validation data to Odoo's core journal entries and financial reports, guaranteeing that all final accounting and invoicing records were synchronized with the government's official EIMS status for simplified audits and enhanced traceability. • Bulk API Processing: Implemented logic for both synchronous and asynchronous API calls (callbacks) to EIMS, enabling efficient, high-volume processing of bulk document registrations and cancellations without impacting Odoo's performance.	
Junior Techno-Functional Consultant, Top Technologies	12/2024 – 06/2025 Addis Ababa, Ethiopia
• Pharmaceutical Process Alignment: Contributed to functional analysis, ensuring core ERP modules (Inventory, Production, QC) were configured to align with Good Manufacturing Practices (GMP) and client SOPs, focusing specifically on accurate batch/lot traceability. • Configuration & UAT: Configured key system components within the Grace ERP environment and executed structured User Acceptance Testing (UAT) scripts to validate critical pharmaceutical workflows, including materials receipt and final product release processes. • Master Data & Compliance: Supported the preparation and validation of complex master data (BOMs, Item Master), guaranteeing data integrity for regulatory compliance and smooth system migration. • Technical Support & Training: Provided essential first-level technical support and debugging, and contributed to the development of basic user manuals and training to promote successful system adoption.	

Junior Software Developer, Ministry of Innovation and Technology (Ethiopia)

11/2023 – 11/2024
Addis Ababa, Ethiopia

- Development and Architecture: Assisted in the full-stack design and deployment of a secure Document Management System (DMS), contributing to a robust, multi-tier architecture. Specifically utilized React.js for developing a responsive user interface and leveraged Node.js to build scalable backend services responsible for handling core business logic, secure data transmission, and crucial database interactions. Feature Implementation and Security: Collaborated to implement critical system enhancements, integrating advanced user authentication and developing core functionality for document versioning to ensure comprehensive audit trails. Gained practical experience in enforcing stringent system security protocols and data management practices, systematically debugging and resolving software defects to uphold system integrity and high uptime. Collaboration, Testing, and Quality Assurance: Contributed actively to maintaining high technical standards by participating in key architectural discussions and executing rigorous testing cycles (unit, integration, and UAT) to validate feature functionality. Directly improved the overall code quality through the performance of detailed peer code reviews and strict adherence to established coding standards and development workflows.

EDUCATION

BSc in Computer Science and Engineering,
Adama Science and Technology University

07/2018 – 07/2023

TECHNICAL SKILLS

- | | |
|--|---|
| • Python XML, CSV | • OOP, functions, loops for Odoo views |
| • PostgreSQL ERP Concepts | • pgAdmin, manipulation CRM, Sales, Purchase, Manufacturing, inventory, accounting basics |
| • Odoo Additional installation, module development and Agile Development, API Integration customization, workflow automation, module extension | • Version Control |
| • Git and GitHub | • Operating Systems |
| • Basics Linux, deployments Web concepts | • HTML/CSS/JavaScript |
| • Other Concepts: | • UI/UX concepts and designs, Cloud Environments |

LANGUAGES

- | | |
|-----------|-----------|
| • English | • Amharic |
|-----------|-----------|

Certificates

- | | |
|---|----------------------------------|
| • - Learning Linux Basics Course & - Python - odoo technical training | • - Javascript - Bage collection |
|---|----------------------------------|
